Dear *Dr. Robert R. Green*

Imagine for a moment a world vastly different no medicine. Contemplate the agony of war, lack of vital nutrients. Think about the help of infection or unchecked diarrhea due to the

This kind of world does exist. For millions especially children — in West Africa this is true they now know after having seen better times have recently lived among these fine people in such stark conditions.

Consider these staggering facts:

1,000,000 children die of malaria each year in
In Nigeria a child might well receive 300 injections
120,000 children under five die annually in Ghana
70% are malnutrition/infection related
Infant mortality: Ghana = 115 per 1,000 live
U.S. = 12 per 1,000

Cold figures do not portray the real tragedy of

These tragedies are being lessened by a volunteer known as: **FRIENDS OF WEST AFRICA**, a nonprofit corporation.

We have made specific inroads on the problem.

Listen to the testimony of an American nurse
"I want to thank you for sending the medicines at the predicament of these people, 'chemist shops' looking for tablets to test for diabetes. We finally had to go to Accra and
"Last week a man needed an emergency for oxygen, antiseptic, and towels before hospital. He looks like he isn't going to make it. We are going to Dr. Kissi tomorrow in hopes of (Dr. Kissi is the unpaid spearhead of our project) those shipped by **FRIENDS OF WEST AFRICA**.

You are vital in continuing this work of mercy
